SKILLS

ABOUT ME

I'm a software developer studying at Epitech. I'm good at working with others and can adapt quickly to new situations. I'm currently looking for a part-time position to help me learn more while I continue my studies.

EDUCATION

EPITECH - European Institute of Technology 2022 - 2027

Software development and IT expert | Bachelor + Master's Degree

EXPERIENCE

NTT Data Frontend Developer Oct / 23 - Dec / 23

I completed a 3-month internship as a Frontend Developer at NTT Data, where I gained hands-on experience with Angular and the basics of Java.

PROJECTS

Graphic Radar Simulation

I developed an air traffic control simulation in C using CSFML, demonstrating expertise in collision detection, entity management, and efficient plane and tower control with linked lists.

Raytracer

Render 3d images by simulating rays' interaction with objects, materials and lights to create realistic graphics.

Arcade

C++ program that allows to play arcade games by using dynamic libraries to load the game and the graphical library
