# Joel Revuelta

Software developer

About Me

As a student at Epitech, I bring a unique combination of technical knowledge and strong interpersonal skills to any project. My ability to effectively communicate and collaborate with others, as well as my adaptability and positive attitude, make me a valuable asset to any team. I am eager to apply my skills in a real-world setting through an internship and continue to grow both personally and professionally.

Projects

🔗 *my_radar*   01/2023

Using C and CSFML I developed an air traffic control panel simulation. In this project I learned how to detect collisions between entities and manage them. Also mastered working with linked lists to control the planes and towers.

🔗 *my_ls*   11/2022

my_ls is a recreation of the ls command in C, including many flags. This project has taught me how to work with files an directories in C.
